

10 October 1962

(TSC) Memo from DIR NSA, Blake → Klocko -
COMUSAFSS.

" I feel... that our first priority Regtmt is
reporting reaction in connection with
high and low level reconnaissance flights.
Our problem is that limitations in physical
facilities enabled us to do

only very limited processing these. The
processing capability presently on board
enabled us to do ~~only very limited~~
~~processing these~~ to meet in a barely
limited fashion the regtmt for reaction
reporting. In order to perform the analysis
necessary to meet the requirements of
CONAD and AFLANT, we would have
to double our present analytic effort

" Based on our preliminary information
it would appear that in addition
to the personnel required to perform
the mission outlined above there may
be space to intercept and process some
portion of the Cuban military problem.
If so, I might further propose a co-
located army - air force facility at

Lt. Gen. Blake asked Kleck for
his comments re: the interim solution
and the longer term solution *
